# CGI OpenMedia Metrics

Monitoring solution for OpenMedia newsroom system administrators

OpenMedia Metrics is a powerful but lightweight PC or Mac-based monitoring solution for OpenMedia newsroom administrators that enables them to visualize the health of their system in real-time.

The solution can be integrated into existing monitoring and business intelligence tools. It can be installed as a complete package, based on open-source products, to provide a range of user-configurable dashboards that grant instant insight into newsroom system status and performance. This includes interfaces into and out of the system, such as web services, XML import, and XML export. Aided by the flexible ability to create alert rules, this allows system administrators to identify and address any issues quickly and easily, as well as identify areas ripe for future development and upgrade.

Key feature:

• Visualization of the newsroom system health

• Real-time data tracking

• High integration

• Customizable dashboard

• Data exchange

• Supports problem-solving and identification

• Alerting

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world. We are insights-driven and outcomes-based to help accelerate returns on your investments. Across hundreds of locations worldwide, we provide comprehensive, scalable and sustainable IT and business consulting services that are informed globally and delivered locally
